我们是谁 Who are we

上海派勒环保科技有限公司是专业地垫系统供应商，旗下包括商用地垫，工业地垫，及家用地垫三大系列产品线。派勒专注于各类应用地垫的设计，研发，生产制造以及销售，已取得20多项地垫的产品发明专利、实用新型专利以及产品外观专利。在上海总部及江苏常州制造中心的基础上，派勒是目前国内行业中自建覆盖华东，华南，华北，西南，东北地区销售及服务网点的专业地垫供应商。

自2008年成立以来，伴随着中国经济与市场的迅速发展，派勒将欧美的地面污染与控制系统的理念带入中国，始终专注于提供有效的地垫系统解决方案，为多达20大行业提供地面问题解决方案，不管是高星级酒店、连锁店铺、物业大楼，公共交通，高端制造，还是家居环境，派勒，好地垫，好地面的理念深入客户心中，真正帮助客户从源头解决地面的污染和安全问题，在为客户节约大量人力成本的同时提升了整体空间的形象！

Shanghai Paaler Environmental Technology Co., Ltd. is a professional floor mat system supplier currently in a leading position in the domestic industry. It includes three series of product lines: commercial floor mats, industrial floor mats, and household floor mats. Paaler focuses on the design, research and development, manufacturing and sales of floor mats for various applications, and has obtained more than 20 product invention patents, utility model patents and product appearance patents for floor mats. Based on the Shanghai headquarters and the manufacturing center in Changzhou, Jiangsu, Paaler is the only professional floor mat supplier in the domestic industry that has self-built sales and service outlets in East China, South China, North China, Southwest China and Northeast China.

Since its establishment in 2008, with the rapid development of China's economy and market, Paaler has brought the concept of advanced ground pollution and control systems from Europe and the United States to China, and has always focused on providing effective floor mat system solutions for more than 20 industries, whether it is high-star hotels, chain stores, property buildings, public transportation, high-end manufacturing, or home environments, the concept of Paaler that good floor mats for good ground is deeply rooted in the hearts of customers, truly helping customers from the source to solve the pollution and safety problems on the ground, which is also save a lot of labor costs and improve the image of the overall space!

为什么需要有效的地面安全与污染控制地毯系统？ Why do we need the effective floor mat system for ground safety and pollution control?

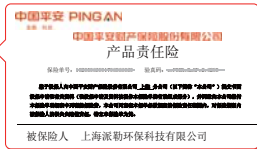

90% 灰尘污染控制

Remove more than 90% of dust pollution control
据统计，75%的灰尘和湿气是由户外携带进入建筑物内，污染室内环境，大大增加清洁成本。有效的地面安全与污染控制系统能够去除高达90%由外界带入建筑物内的灰尘与湿气。According to statistics, 75% of dust and humidity are carried into buildings from outdoors, polluting the indoor environment and greatly increasing cleaning costs. An effective ground safety and pollution control system can remove up to 90% of the dust and moisture brought into the building from the outside.

降低滑倒事故的风险

Reduce the risk of slip and fall accidents
派勒地毯均承保第三方责任险，如因产品存在缺陷导致的人身伤害，将由保险公司作出相应赔偿，派勒建议客户使用更值得信赖的产品。Paaler floor mats are covered by third-party liability insurance. If personal injury is caused by product defects, the insurance company will make corresponding compensation. Paaler recommends customers to use more reliable products.

保护和改善室内地铺材料的外观

Protect and improve the appearance of indoor flooring materials
室内地铺材料的外观污染通常是由难以清理的大颗粒沙石和灰尘的积累与磨损造成的，通常这些污染导致室内地铺材料需要被提前更换。有效的地面安全与污染控制系统能够避免这些不必要的成本支出。The appearance pollution of indoor floor materials is usually caused by the accumulation and wear of large particles of sand and dust that are difficult to clean. Usually, these pollution causes indoor floor materials to be replaced in advance. An effective ground safety and pollution control system can avoid these unnecessary costs.

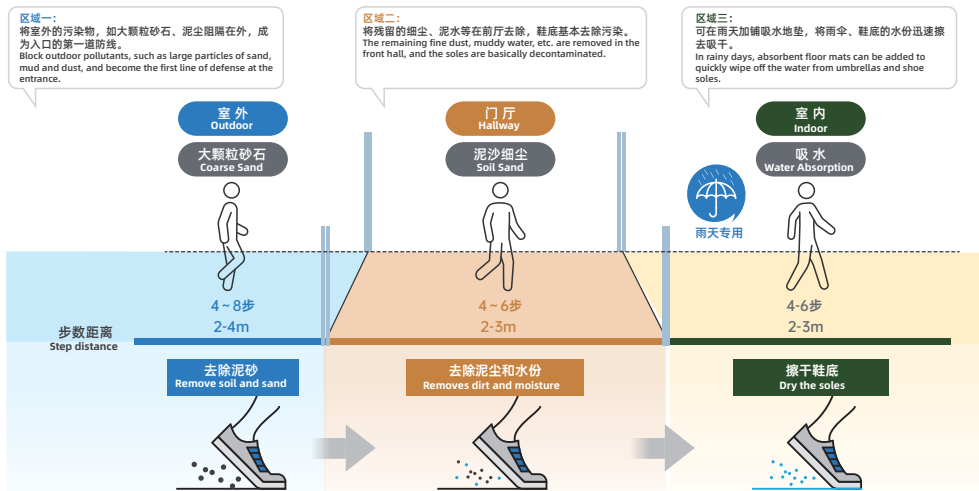

降低清理和维护成本

Reduce cleaning and maintenance costs
研究表明，一天当中多达几公斤重的尘土和污垢将会被行人或其他车辆设备带入建筑物内，而去除1公斤灰尘的成本要高达人民币700元，同时在室内地铺材料的使用周期内，其维护成本高达初次购买成本的86%。在这种情况下，地毯系统大大降低了维护费用。Studies have shown that up to a few kilograms of dust and dirt will be brought into the building by pedestrians or other vehicles in a day, and the cost of removing 1 kilogram of dust will be as high as RMB 700, and at the same time during the life cycle of indoor floor materials, its maintenance cost is as high as 86% of the initial purchase cost. In this case, the floor mat system greatly reduces maintenance costs.

地毯三区设置示意图

3-Zone of floor mat

“地毯三区设置”是从室外到室内的完整地毯系统设置。从大门外刮除大颗粒砂石，到达门厅后去除细沙，最终在室内擦干鞋底水渍。
3-Zone of floor mat is a complete floor mat system setting from outdoor to indoor. Scrape large particles of sand from outside the gate, remove fine sand after reaching the foyer, and finally dry the water stains on the soles of the shoes indoors.

Q A 地毯百科知识 Floor mat encyclopedia knowledge

01 地毯与地毯的区别？

What is the difference between carpet and floor mat?

	地毯	地毯
材质不同	材质丰富	纤维原料纺织
功能不同	清洁、防滑、防静电、抗疲劳、防震、保护地面等功能	装饰功能
使用区域不同	应用广泛，室内外均可	室内办公、居家区域
清洁方式不同	清洁简单，水洗、吸尘即可	清洁复杂，需专业人士和专业设备
使用寿命不同	耐磨耐用，使用寿命长	羊毛棉麻材质，容易霉变损坏

02 地毯可以定制吗？

Can floor mats be customized?

派勒地毯均为定制产品，不论从产品方案、地毯尺寸、LOGO设计、施工铺设都可以满足客户一站式的定制需求。Paaler floor mats are all customized products, which can meet the one-stop customization needs of customers in terms of product scheme, floor mat size, LOGO design, and construction and laying.

03 我们的地毯安全吗？

Are our floor mats safe?

派勒地毯均采用安全的环保类材料制成，常见的劣质地毯渗入不环保和廉价材料，气味难闻浓烈，且长期在密闭环境中使用该类产品可能致癌和其它健康问题。派勒地毯通过国家权威无毒环保检测，无异味、无毒无害、无甲醛，可完全放心使用。Paaler floor mats are made of safe and environmentally friendly materials. The common inferior floor mats are mixed with non-environmental protection materials, which have an unpleasant and strong smell, and long-term use of this product in a closed environment may cause cancer and other health problems. Paaler floor mats have passed the national authoritative non-toxic and environmental protection testing, with low odor, non-toxic and harmless, and formaldehyde-free, so they can be used with complete confidence.

04 地毯需要阻燃吗？

Do floor mats need to be flame retardant?

国家规定的防火材料等级中：B1级为难燃性建筑材料。难燃类材料有较好的阻燃作用：其在空气中遇明火或在高温作用不易起火，不易很快发生蔓延，且当火源移开后燃烧立即停止。派勒全系列产品均符合国家B1级标准或行业标准的。Among the fireproof material grades stipulated by the state: B1 grade is a flame retardant building material. Flame retardant materials have better flame retardant effect: they are difficult to catch fire in the air or under the action of high temperature, and are not easy to spread quickly, and the combustion stops immediately when the fire source is removed. In Paaler's series of products, some products are in full compliance with national B1 standards or industry standards.

05 地毯需要清洗保养吗？

Do the floor mats need to be cleaned and maintained?

需要。地毯是地面清洁的功能类产品，长期使用会积累大量污染物，使得功能性减弱。地毯要定期进行清洁维护，才能够确保其正常的使用效果。详细清洁维护方法，毯面型地毯，疏水防污类地毯，具体详见66页。The floor mat is a functional product for cleaning the ground, which will accumulate a lot of pollutants and weaken the functionality after long-term use. The floor mat should be cleaned and maintained regularly to ensure the normal use effect.

Andes 安第斯-宽纹环扣铝合金地垫

HOT
宽条纹更大气
无缝隙更省力

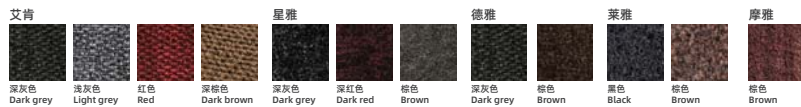

环扣封闭式无缝隙铝合金，灰尘无处可藏，易于清洁；宽条纹设计，大气美观，多种毯面可选，满足各种建筑设计风格。
Ring buckle closed seamless aluminum alloy, nowhere to hide dust, easy to clean; wide stripe design, beautiful atmosphere, a variety of blanket options to meet various architectural design styles.

毯面颜色 Blanket color

多种色系、各式花纹，可搭配不同设计风格，适用各种场合。
A variety of colors and patterns can be matched with different design styles for various occasions.

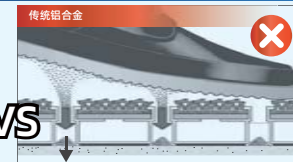

封闭式无缝表层，便于清洁维护 Closed surface without gaps for easy cleaning and maintenance

第二代互锁结构，更不易变形。
The second-generation interlocking structure is less prone to deformation.

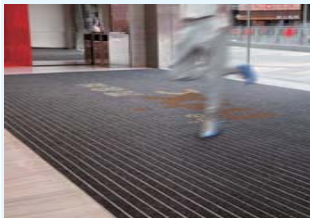

灰尘污物都落在地垫上方，方便日常清洁。
Dust and dirt all fall on the floor mat, which is convenient for daily cleaning.

传统铝合金，灰尘通过缝隙，落于后部，藏污纳垢，难以清理。
Traditional aluminum alloy, dust is difficult to clean.

更强大的除尘效果 More powerful dust removal effect

毯面更宽
除尘效果提升40%
Dust removal effect increased by 40%

模块化铝合金，安装便捷 Pull-out installation

模块组装
安装效率提升50%
Efficiency increased by 50%

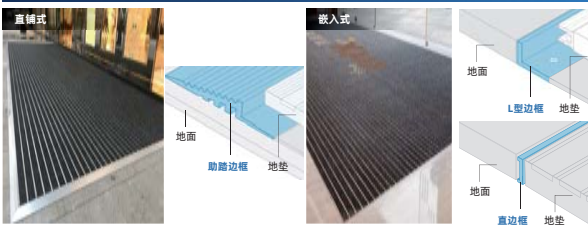

更新颖的LOGO展现 More novel LOGO display

- ① 不锈钢镶嵌
- ② 毯面镶嵌
- ③ 炫彩发光(内配遥控器，支持12种单色)

更新颖的LOGO展现，提供更多元的品牌展现方式，符合不同的设计风格和需求。
More novel logo display, providing more diversified brand display methods, in line with different design styles and needs.

两种铺设方式 Two laying methods

清洁维护 Cleaning

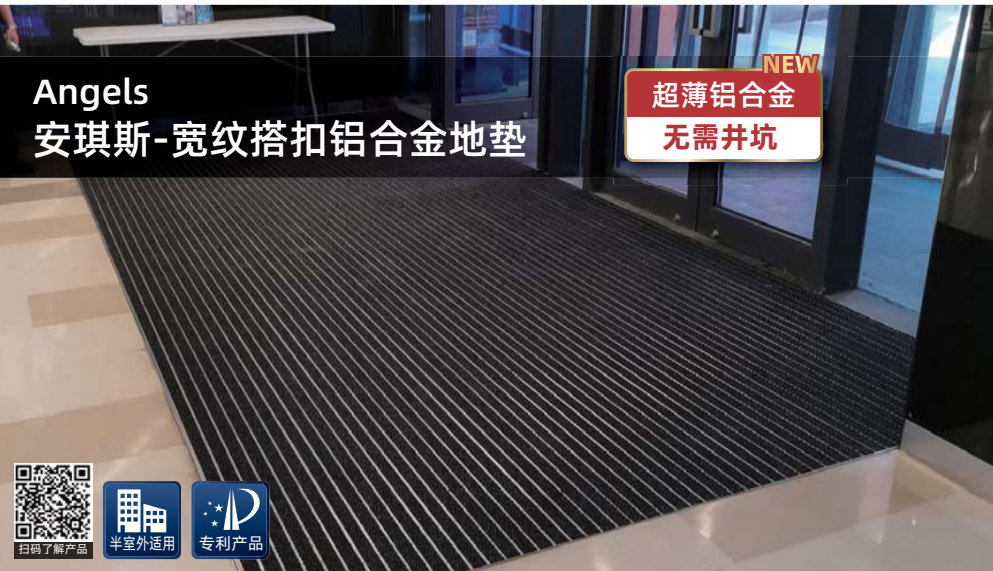

日常清洁：用吸尘器吸尘。
日常清洁：用吸尘器吸尘并清扫之后，地垫可以用高压清洗设备进行喷射清洗。
Deep Cleaning: After vacuum aspiration and cleaning, floor mat can be cleaned with high pressure jet cleaning equipment.

适用区域 Suitable Area

适用于商业环境及人流量密集区域，如酒店、商场、写字楼、机场等出入口区域。
Suitable for commercial environments and areas with high pedestrian traffic, such as entrance areas of hotels, shopping malls, office buildings, airports, etc.

Angels 安琪斯-宽纹搭扣铝合金地垫

NEW
超薄铝合金
无需井坑

互扣式宽条纹设计，无缝隙易清洁；更轻薄的铝合金，无需井坑铺设，适用场景多样化。
Interlocking wide stripe design, seamless and easy to clean; thinner aluminum alloy, no need for pit laying, suitable for diverse scenarios.

技术参数 Technical parameter

EMCO 安高-铝合金地垫

欧洲的铝合金地垫系统，实用主义和艺术设计的完美结合，深受国内外设计师青睐。
The aluminum alloy floor mat system from Europe is a perfect combination of practicality and artistic design, highly favored by designers both domestically and internationally.

可收卷清理 Rewindable for cleaning

可收卷的铝合金地垫，方便日常清理地垫底部灰尘
The rollable aluminum alloy floor mat allows for easy cleaning of the dust on the bottom of the mat in daily use.

独有的铝合金弧形结构 Unique aluminum alloy arc structure

可设计出更独特的门厅效果，与众不同的高端品质
It can create a more unique entrance effect and stands out with its exceptional high-end quality.

多种组合，根据不同人流量和场景定制产品
Customizable products

Deco 德克嘉-铝合金地垫

DOUBLE
超强耐磨
双面使用

- 半室外适用
- 超强耐磨
- 可过推车
- 质保年限

适合高人流量的铝合金地垫。采用铝合金与橡胶毯面间隔串联的工艺，双层+双面结构，双倍的使用寿命和牢固度。Suitable for high-traffic areas, the aluminum alloy mat features a construction that combines aluminum alloy with rubber matting in a series of interlocking sections. With a double-layer and double-sided structure, it offers twice the lifespan and durability.

结构稳固，承重碾压不变形
Stable structure, no deformation under load-bearing rolling

承重 高达10万次碾压测试
500KG Up to 100,000 rolling tests

手推车/叉车 托盘车 叉车 箱式叉车

500公斤手推车来回滚动测试，达到10万次级别而未变形或严重磨损。It has been tested by repeatedly rolling a 500kg handcart back and forth, reaching the level of 100,000 cycles without deformation or significant wear.

高强度钢线链接，双毯面设计，使用寿命加倍
Double carpet design, double the service life

水份

铝合金作为骨架，垂直排列的橡胶毯面作为承重基体，不易变形的同时还能减震消音和锁水。With an aluminum alloy frame and vertically arranged rubber velvet surface as the load-bearing substrate, the product is not only resistant to deformation but also provides shock absorption, sound insulation, and water locking properties.

清洁维护 Cleaning
日常维护：用吸尘器吸尘。
深度维护：用吸尘器吸尘并清扫之后，地垫可以用高压清洗设备进行喷射清洗。
Daily Maintenance: Use vacuum cleaner to clean the dust.
Deep Maintenance: After vacuum aspiration and cleaning, floor mat can be cleaned with high pressure jet cleaning equipment.

适用区域 Suitable Area
适用于商业环境及人流量密集区域，如酒店、商场、写字楼、机场等出入口区域。Suitable for commercial environments and high-traffic areas such as hotels, shopping malls, office buildings, airports, etc.

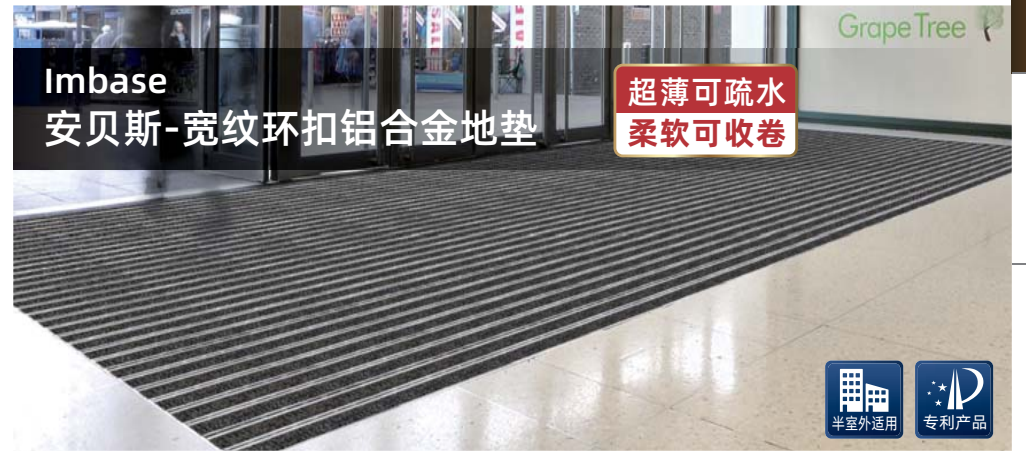

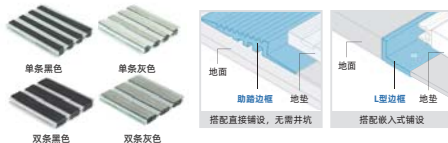

承重实验对比 Comparison of load-bearing experiments

德克嘉 ✓ 其他铝合金 ✗

Imbase 安贝斯-宽纹环扣铝合金地垫

超薄可疏水
柔软可收卷

- 半室外适用
- 专利产品

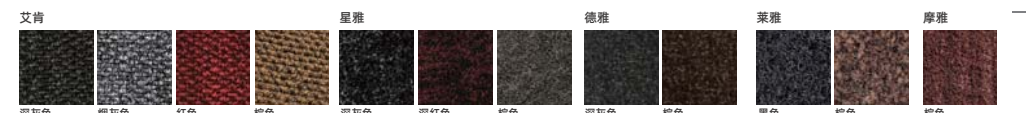

安贝斯采用带孔橡胶连接条的互锁结构，不需要钢丝绳即可串联，多毯面选择，美观大气，方便清洁，铝合金地垫中的精品之作。The IMBASE has unique interlocking design of ring shaped section with perforated rubber connecting strip, it can be connected in series without wires. multi carpet surface selection, beautiful asphere, convenient cleaning, fine work in aluminum alloy floor mats.

橡胶串联互锁结构，易收卷柔性强
Rubber interlocking structure in series, easy to roll up and flexible

打破传统铝合金地垫结构设计，使用带孔橡胶连接条互锁设计，无需钢丝绳串连。Broken the structure design of the traditional aluminum mat, interlocking with perforated rubber connecting strip design, no wire rope.

镂空结构，灰尘留于表面，污水流于下面
Hollow structure, dust left on the surface, sewage flow below

橡胶连接条小孔镂空连接结构，灰尘污物都落在地垫上面，同时又可以疏导水流，只需清洁地垫上面。The rubber connecting strip has a small hole hollow connection structure, so that dust and dirt fall on the floor mat, and at the same time it can dredge the water flow, and only need clean floor mat.

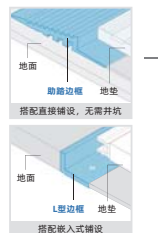

技术参数 Technical Specifications

地垫型号 Product Type	AB1502	AB1504	AB1506	AB1507	AB1509

阻燃等级 Flammability					GB8624-2012:B1

清洁维护 Cleaning
日常吸尘器吸尘，定期可采用高压清洗设备进行清洗。Daily vacuum cleaners use vacuum cleaning equipment for cleaning.

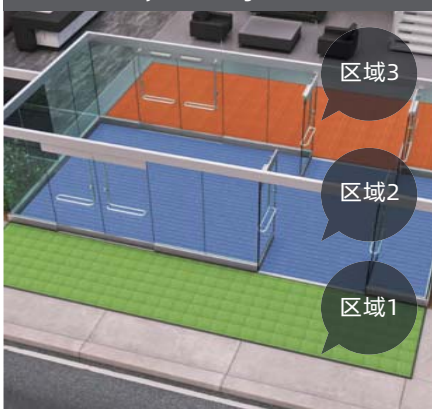

适用区域 Suitable Area
适用于各种商业环境及人流量密集区域，如写字楼，接待室，会议室，走廊公寓等各类出入口。Suitable for various commercial environments and high-traffic areas such as offices, reception areas, conference rooms, hallways, and entrances of apartments.

模块类刮沙除尘地垫系统知多少？ Do you know modular type sand scraping and dust removal floor mat system?

模块地垫系统区域设置 Modular mat system settings

区域3室内

位置: 内部空间
目标: 移除残留的水分和小颗粒
推荐使用: 福雅 41页、艾美增强型 44页
Location: Interior space
Purpose: Remove residual moisture and small particles
Recommendation: Forever P41, Absorpa plus P44

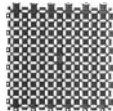

区域2前厅

位置: 门厅或防风门等封闭的建筑物入口
目标: 截留污垢、碎屑和水分
推荐使用: 皮克斯 21页
Location: Enclosed building entrances such as foyers or storm doors
Objective: Retain Dirt, Debris and Moisture
Recommendation: Pixor P21

区域1室外

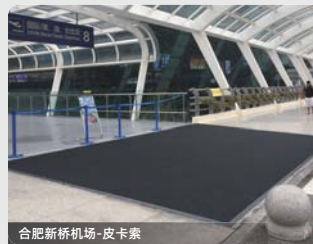

位置: 建筑物入口的外部
目标: 截留砂石、重污垢颗粒和水分，包括雪、盐和沙子等
推荐使用: 皮卡索 23页
Location: Exterior of building entrance
Purpose: Retain grit, heavy dirt particles and moisture, including snow, salt and sand
Recommendation: Picasso P23

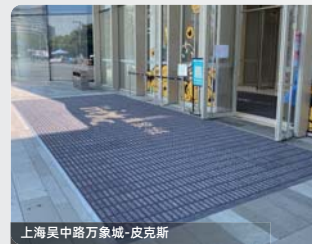

01 常用于人流量高、高端商业环境

Commonly used in high-traffic and upscale commercial environments.

根据研究表明，人流量超过5000人次每天的场景，乐于在户外使用模块型地垫；户外到室内的场景需要进行大颗粒除尘，细沙除尘、吸水去污。模块型地垫，铺设具有一体性，更加大气。其中选择频繁的人群类型是医院、景区乐园、高端酒店、高端商场、公共交通枢纽。According to research, in scenarios with a daily foot traffic exceeding 5000 people, LeZong is dedicated to using modular mats outdoors. For scenarios transitioning from outdoor to indoor, it is necessary to perform coarse particle dust removal, fine sand dust removal, and water absorption and stain removal. The modular mats are designed to have an integrated structure, providing a more sophisticated appearance. The frequent user types for these mats include hospitals, scenic parks, high-end hotels, high-end malls, and public transportation hubs.

合肥新桥机场-皮卡索

上海吴中路万象城-皮克斯

重庆华润万象城-福雅

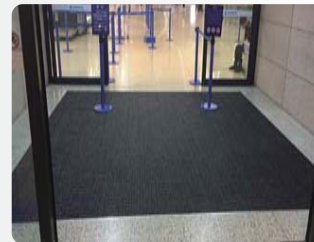

02 有无井坑皆可使用，整体性高要求的设计需求

It can be used with or without pit, which meets the design requirements of high integrity.

对井坑没有强制性要求，由于模块设计有专属的斜坡边条，可满足直接铺设的要求。且产品自重性很强，可以牢牢的固定在地面上，不会有被踢起位移、绊倒的风险。

There is no mandatory requirement for the pit, because the module is designed with an exclusive slope edge, which can meet the requirements of direct laying. And the product has a strong self-weight and can be firmly fixed on the ground without the risk of being kicked up, displaced or tripped.

异形拼接、井坑皆适用 Suitable for special-shaped splicing and well pits

03 单片模块设计，更替成本更低

Fast installation and lower replacement costs

模块式卡扣设计，像拼图一样简单敲击安装。每块产品都是独立的，损坏后局部替换简便。相比大面积的整体性产品，可节约更多维护替换成本。

Modular snap design, easy to knock and install like a puzzle. Each product is independent and easy to replace locally after damage. Compared with large-area integrated products, it can save more maintenance and replacement costs.

皮克斯安装视频

安装简单快捷 Easy to install

模块片材拼接

用塑料榔头敲打拼紧

用尺子和美工刀轻松切割

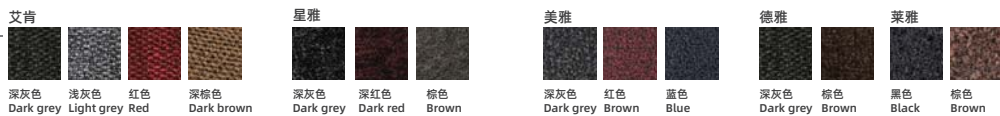

Pixor 皮克斯-刮沙除尘吸水模块地垫系统

模块拼接
适合高人流量区域

- 半室外适用
- 可过推车
- 抗紫外线
- 质保年限
- 专利产品
- 模块拼接

模块式结构，可自由拼接，安装简单快捷；可安装在井坑、或者配上适合的边条直接铺设在地面上，适用于高人流量、高端商业场景的出入口。The modular structure can be freely spliced, and the installation is simple and quick; it can be installed in the pit, or can be directly laid on the ground with suitable edge strips, which is suitable for the entrance and exit of high-traffic and high-end business scenarios.

超过14种的毯面选择，可以任意搭配你需求的设计风格 and 颜色。

皮克斯 VS 市面常见三合一 Pixor VS common three-in-one in the market

① 耐磨度对比 Durability

耐磨性强，皮克斯地垫使用2年依旧如新，刮沙能力不减
Strong wear resistance, Pixor floor mats are still as new after 2 years of use, and the sand scraping ability is not reduced.

② 产品自重对比 Product weight comparison

皮克斯自重比其他产品高出50%，不易移位踢绊
The weight of Pixor is 50% higher than that of other products, and it is not easy to shift and trip.

UP 灵活组合 无毯面和有毯面互拼，设计图案多样化

The non-carpet surface and the carpet surface are combined with each other, and the design patterns are diversified

除尘能力更佳，使用成本更经济
Better dust removal ability, lower cost of use.

设计方式多样化 Diversified design methods

模块互拼，色彩任搭 Module interlocking 镶嵌logo Inlaid logo

清洁维护 Cleaning

日常维护: 用吸尘器吸尘。
深度维护: 用吸尘器吸尘并清扫之后, 地垫可以用高压清洗设备进行喷射清洗。
Daily Maintenance: Use vacuum cleaner to clean the dust.
Deep Maintenance: After vacuum aspiration and cleaning, floor mat can be cleaned with high pressure jet cleaning equipment.

适用区域 Suitable Area

适用于高人流量出入口, 如机场、商场、酒店、医院、车站等。
Suitable for high-traffic entrances such as airports, shopping malls, hotels, hospitals, and train stations.

Q A 毯面型刮沙除尘地垫知多少?

Do you know about the carpet type sand-scraping and dust-removing floor mat?

01 刮沙除尘地垫的基本原理 The basic principle of scraping sand and dust-removing floor mats

02 毯面材料如何区分和选择? How to distinguish and choose blanket materials?

总的来说, 尼龙是更优质的一种材料, 兼具刮沙和吸水功能, 且各项性能都表现良好。但丙纶也是常用的刮沙除尘地垫之一, 其优点为高性价比。
In general, nylon is a better material, with both sand-scraping and water-absorbing properties, and all properties perform well. However, polypropylene fiber is also one of the commonly used sand scraping and dust removal floor mats, and its advantages are high cost performance.

	耐磨型	色牢固	吸水性	回弹性	阻燃性	价格	
丙纶	●	●	●	●	●	低	极优 ●
尼龙6	●	●	●	●	●	一般	优 ●
尼龙66	●	●	●	●	●	高	良好 ●

03 圈绒和簇绒的区别? What is the difference between looped and tufted?

开放式簇绒结构的接触面积更大, 鞋底刮沙除尘的效果更好, 且更容易进行日常清洁。
The open tufted structure has a larger contact area, better scraping and dust removal, and easier daily cleaning.

圈绒结构用结构保证回弹性, 适用于较差产品。
Use structure to ensure resilience, suitable for poor products.

04 毯面染色方式有哪些不同? What are the different ways of dyeing on the blanket?

原液染色: 原液染色工艺生产的同质透心纤维加工的纱线, 再纺织出来的毯面, 色牢度佳。
The yarn processed by the homogeneous core fiber produced by the dope dyeing process, and then the carpet surface spun out has the best color fastness.

喷印: 在白色的胚毯面上喷墨打印各种图案, 实现丰富有层次的图案效果。
Inkjet printing various patterns on the white blank surface to achieve rich and layered pattern effects.

05 有哪些可以定制的LOGO形式? What LOGO forms can be customized?

派勒具有独立的设计部门, 可及时响应定制Logo设计需求。
Paaler has an independent design department, which can respond to customized Logo design needs in a timely manner.

- ① 镶嵌LOGO Inlaid LOGO: 将不同颜色和材质的毯面用镶嵌工艺粘合, LOGO可以选择各种毯面进行定制, 呈现立体、大气的效果。
- ② 印染LOGO Printing and dyeing LOGO: 可以满足更具有个性的定制要求, 呈现丰富的颜色和图案, 让你的品牌形象富有创意。
- ③ 彩标LOGO/烫金 Color logo/Bronzing: 派勒独有工艺, 可以选择不同毯面材质和多种颜色组合, 是有特定LOGO颜色需求客户的不二之选。

06 清洁维护方法 Cleaning and maintenance methods

- ① 日常清洁 Daily Cleaning: 高人流量区域 每天; 低人流量区域 2-3天。强烈建议使用直立式滚刷吸尘器! 能够将纱线根部的灰尘翻起, 吸尘更彻底, 并起到修整簇绒的效果!
- ② 家庭清洁 Deep cleaning: 高压水枪 清洗后用出风机电吹干, 每60天进行一次; 地毯清洗机 清洗后用出风机电吹干, 每60天进行一次。
- ③ 顽固污渍 Stubborn stains: 对于顽固污渍, 可在高压水枪/地毯清洗机中配以中性清洁剂进行清洗。

清洁维护 Cleaning

日常清洁: 将椰棕地垫翻过来拍打地垫背底，以将藏在垫里的灰尘和沙子及其他颗粒垃圾清空。
深度清洁: 使用水枪对地垫毯面冲洗，再将翻过来将地垫毯面向下，以便深处的灰尘和沙子能随水流出。将地垫彻底晾干，可放在通风的地方或用鼓风机加速风干。
Daily Cleaning: Turn the coconut palm mat over and tap the back of the mat to remove the dust, sand and other particulate garbage hidden in the mat.
Deep Cleaning: Rinse the surface of the carpet with a water gun, then turn it over and turn the carpet down, so that the deep dust and sand can flow out with the water.
Dry the floor mat thoroughly and place it in a ventilated place or use a blower to speed up the air-drying.

适用区域 Suitable Area

适用于酒店、商场、写字楼、工厂、学校等各种出入口的除尘，特别适用于各种形象店、概念性建筑设计的人口除尘。
Suitable for various entrances in hotels, shopping malls, office buildings, factories, schools, and other establishments, this product is especially suitable for dust removal at entrances of image stores and conceptually designed buildings.

吸水地垫知多少?

Do you know about the absorbent mat?

01 吸水“三步走”的原理 The principle of water absorption "three steps"
专业的吸水地垫需要满足“三步走”原理，即普通成年人走三步的距离，可以清除鞋底的泥水、污渍。
Professional absorbent floor mats need to meet the "three-step" principle, that is an average adult walks three steps to remove muddy water and stains on the sole.

吸水实验对比

双条纹吸水性能差，走三步后鞋底仍旧潮湿 艾美增强型吸水性能极强，走三步后无脚印

02 吸水地垫材料怎么选? How to choose absorbent mat material?

尼龙 nylon

刮沙除尘+吸水吸油
Scraping sand and dust absorb water and oil

雨天专铺推荐

超细纤维 superfine fiber

吸水吸油
Absorb water and oil

小TIPS: 超细纤维吸水性为什么那么强?
Why is the water absorption of microfiber so strong?

超细纤维可以吸附自身重量7倍的灰尘、颗粒、液体。每根纤维只有头发的1/200。这就是超细纤维具有超强清洁能力的原因。

Microfiber can absorb up to 7 times its own weight in dust, particles and liquids. Each filament is only 1/200 the size of a hair. That's why microfiber has super cleaning power.

03 背底材料怎么选? How to choose the backing material?

橡胶地垫是吸水地垫中使用相对更好一些的，柔软有韧性，可以用于工业洗衣机清洗。

Rubber floor mats are relatively better used in absorbent floor mats are soft and tough, and can be washed with industrial washing machines.

使用推荐: 具有油污、寒冷室外，推荐使用丁腈橡胶背底；需要经常清洗、片材使用，推荐使用橡胶背底；通常情况下PVC背底均已适用；
Recommended to use nitrile rubber backing for oily dirt and cold outdoors, and rubber backing is recommended if it needs to be cleaned frequently. Generally, PVC back and bottom are applicable.

	耐油污 Oil-resistant	耐磨 Wear-resistant	耐温抗寒 Heat & cold resistant	柔韧性 Flexibility	抗老化 Anti-aging	黏地性 Grounding	工业洗衣机清洗 Industrial washing machine cleaning	稳定性 Stability

Logo Mat 印染logo地垫

派勒将地毯印花技术，应用到定制地毯领域，能最大程度的展示复杂图案，色彩及设计，效果精美绝伦。在地毯上实现您所有的设计梦想，助力您的企业形象和企业文化留给客户第一印象。The dyeing technology is taken to customized mat market, which can maximize enabling complicate pattern, color and design effect. Recreate all exquisite details beyond compare. Fulfill your design dream in the mat, and deliver the perfect first impression to your customers.

尺寸可定制，具体请联系我们

可以定制的LOGO形式? Which form of LOGO can be customized?

派勒具有独立的商业设计部门，可以及时响应定制设计需求。Paaler has an independent commercial design department that can respond to custom design needs in a timely manner.

① 镶嵌LOGO Inlaid LOGO

将不同颜色和材质的毯面用镶嵌工艺粘合，LOGO可以选择各种毯面进行定制，呈现立体、大气的效果。*LOGO的线条粗细不能小于1厘米。The carpet surfaces of different colors and materials are bonded by the mosaic process, and the LOGO can be customized by selecting various carpet surfaces to present a three-dimensional and atmospheric effect. *The thickness of the lines of the LOGO cannot be less than 1 cm.

② 印染LOGO Printing and dyeing LOGO

可以满足更具有个性的定制要求，呈现丰富的颜色和图案，让你的品牌形象富有创意。It can meet more personalized customization requirements, present rich colors and patterns, and make your brand image creative.

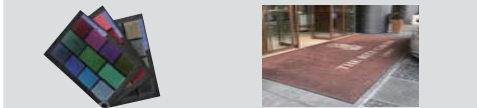

③ 彩标LOGO/烫金 Color logo/Bronzing

可以选择不同毯面材质和多种颜色组合。Multiple options of carpet materials and color combinations are available to choose from.

印染地毯设计流程: Printing and dyeing floor mat design process

- 1 客户提供图案、LOGO矢量图 Customers provide patterns
- 2 设计师根据制作要求出图 Drawing according to the requirements
- 3 双方确认定稿颜色及其他事项 Both parties confirm the final color
- 4 生产制作+完成交付 Production production and complete delivery

清洁维护 Cleaning

建议每日用吸尘器清洁，定期采用低泡清洗，清洗水温不超过60°C。The recommended cleaning method is to use a vacuum cleaner daily and periodically use a low-foam cleaning method with a cleaning water temperature not exceeding 60°C.

适用区域 Suitable Area

适用于各种室内区域。Available for any area indoor.

地垫的疏水防滑性能你了解吗？ Do you know the hydrophobic and anti-skid floor mat?

01 怎么样的疏水防滑地垫好？ What kind of hydrophobic anti-skid floor mat is better?

- ① 必须具备防滑等级的检测报告。派勒所有疏水防滑地垫均通过“油湿斜坡法”的R10防滑等级，安全可靠。
TIPS: 派勒已承保第三者责任险：如由于地垫产品质量问题导致的滑倒受伤，派勒承担主要责任。
- ② 材料环保性。产品通常在密闭环境中使用，需要无异味、无二次回收料，确认其环保安全。
- ③ 经久耐用。
① Must have the test report of anti-skid grade.
② Material environmental protection.
③ Durable.

02 哪些场景需要疏水防滑？ Which scenarios require hydrophobicity and slip resistance?

所有潮湿、有水、有油地面都需要配备防滑地垫，乐园景点、泳池会所、星级酒店，明文规定均需达到地面防滑标准。
All wet, watery, and oily surfaces need to be equipped with non-slip floor mats. Paradise attractions, swimming pool clubs, and star-rated hotels are expressly required to meet the ground non-slip standards.

03 公共场所，使用阻燃的地垫更安全！

In public places, it is safer to use flame retardant floor mats!
派勒疏水防滑地垫均通过阻燃B1等级，遇火难燃，离火自灭。选择石墨黑系列更具有隐藏脏污的效果，公共场所更适用！
Paaler's hydrophobic and anti-skid floor mats are all flame retardant with B1 grade, and are not flammable in case of fire. Choosing the graphite black series has the effect of hiding dirt, and it is more suitable for public places!

B1级阻燃，遇火难燃，离火自灭 4年产品依旧如新

04 我该用哪款疏水防滑地垫？

Which hydrophobic anti-slip mat should I use?

卫生间/高流量场所

安波-超强防滑疏水地垫4.0, 详见P51页

表面加强防滑颗粒，安全耐脏
With anti slip particles, more safe and dirt resistant

游泳池/淋浴间

安波-疏水防滑地垫2.0, 详见P53页

6mm高度立柱，加速水流循环，表面无积水
6mm height column, no water on the surface

厨房

安迪非-安全防滑抗疲劳垫, 详见P55页

模块设计实现拼接自由，且防滑又耐油
Free splicing, non-slip and oil-resistant

05 为什么要使用模块型疏水防滑地垫？

Why Use Modular Hydrophobic Anti-Slip Floor Mats

安波-疏水防滑地垫2.0, 详见P53页

环扣拼接
整体性强
牢固不移位

其他地垫

卷材铺设
无法注意拼接
不能全面覆盖
易移位绊倒

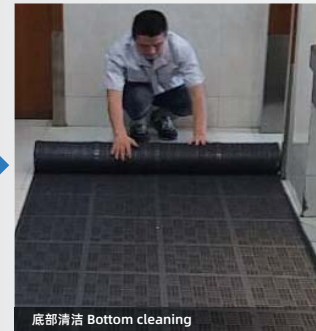

06 疏水防滑地垫的清洁方法

How to clean hydrophobic non-slip floor mats

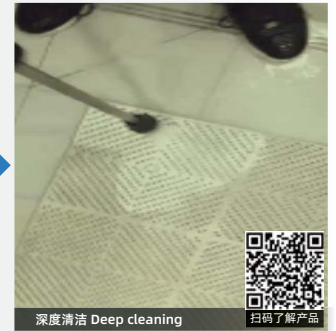

日常清洁 Daily cleaning

长柄刷 Long handle brush

底部清洁 Bottom cleaning

单向收卷锁扣不易散，好移动，便于清洁 Roll up to clean the bottom

深度清洁 Deep cleaning

高压冲洗搭配中性清洁剂 High pressure washing

- 抗紫外线(可选)
- 质保年限

模块拼接式防滑地垫，疏水透气，安全防滑，可任意组合，安装方便，可收卷，搭扣不脱落！
Modular mat which is hydrophobic and non-slip, can be assembled in anyway and easy installation.

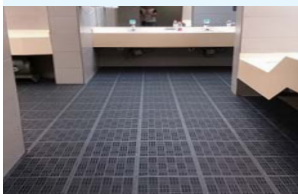

可DIY拼图

户外应用 抗紫外线

孔直径小于4.3mm，不卡高跟鞋，适用于公共卫生间
Dense 5mm hole spacing, won't jam the heel, suitable for public toilets

加密设计，防止卡跟摔倒
Encrypted design to prevent the card from falling

权威检测报告 & 专利证书
Authoritative test report & patent certificate

阻燃等级B1 专利产品 防滑等级R10

自由拼接，时尚感强，适合多场景
Free splicing, strong fashion sense, suitable for multiple scenes

搭扣设计，无缝拼接
Buckle design
seamless stitching

柔软可收卷，便于冲洗清洁
Soft and rollable, easy to rinse and clean

表面污垢，毛刷清洁
Surface dirt, brush cleaning

升级版 加强防滑型-安波4.0

30cm x 30cm 石墨黑

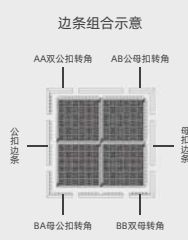

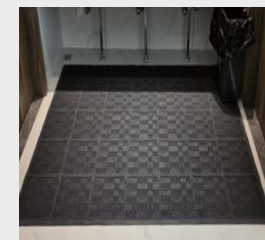

边缘轮胎纹防滑，柱状凸点，高人流量适用
Tire tread seams, double anti-slip, suitable for high traffic

防滑型-安波3.0

30cm x 30cm

半球凸点，可光脚行走，脚感舒适防滑
Hemisphere bump, can walk barefoot, comfortable and antiskid

安波4.0&3.0均配备边条，更牢固不易脱落
Equipped with side strips, firm and not easy to fall off

适用区域 Suitable Area

适用于泳池、健身房、淋浴间、卫生间和盥洗室等需要疏水防滑的区域。
This is applicable to areas that require drainage and anti-slip properties such as swimming pools, gyms, shower rooms, bathrooms, and washrooms.

清洁维护 Cleaning

建议每日用清水冲洗，每两周用中性洗涤剂刷洗后用清水冲洗。
Using hosing daily cleaning, scrubbing with PH7 cleaner twice a month.

你了解抗疲劳地垫吗？ Do you know about anti-fatigue floor mats?

01 什么是抗疲劳地垫？ What is an anti-fatigue mat?

长时间站立的工位，需要放置抗疲劳地垫。抗疲劳地垫是由超强回弹性的材料构成，可有效缓解因长期站立带来的疲劳感，从而提高工作效率和提升员工满意度。
Work stations that stand for a long time need to place anti-fatigue floor mats. The anti-fatigue floor mat is made of super-resilient materials, which can effectively relieve the fatigue caused by long-term standing, thereby improving work efficiency and employee satisfaction.

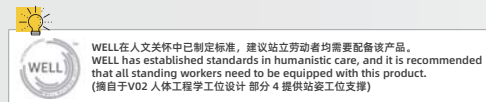

02 抗疲劳地垫越软越好吗？ Are the anti-fatigue mats as soft as possible?

不是。好的抗疲劳地垫并不会强调柔软，而是需要材质兼具柔软和长期保持回弹性，往往太软的材料，长期站立会加剧疲劳感，站里面容易形成塌陷。
No. A good anti-fatigue floor mat does not emphasize softness, but requires a material that is both solid and soft and maintains resilience for a long time. Often materials that are too soft will aggravate fatigue when standing for a long time, and they are prone to collapse inside.

03 为何要使用抗疲劳地垫？ Why use anti-fatigue mats?

当一个人长期站在坚硬的地面上，腿部肌肉容易紧张并且收缩，导致静脉曲张，身体很快出现疲劳。抗疲劳地垫富有弹性材料，可以巧妙地转移人体重量，从而减少身体疲劳感，提高工作效率。
When a person stands on a hard ground for a long time, the leg muscles tend to tense and contract, resulting in varicose veins, and the body quickly becomes fatigued. The anti-fatigue floor mat is rich in elastic material, which can transfer the weight of the human body ingeniously, so as to reduce the feeling of physical fatigue and improve work efficiency.

04 抗疲劳地垫种类及应用场景 Types and application scenarios of anti-fatigue floor mats

具有艺术质感的毯面和PVC发泡相结合，毯面美观耐磨，PVC发泡能有效减缓长期站立工作带来的身体疲劳，提供舒适的工作条件，四面斜坡设计，防踢绊，增加安全性。
The carpet surface with artistic texture is combined with PVC foam. The carpet surface is beautiful and wear-resistant, and the PVC foam can effectively reduce physical fatigue caused by long-term standing work and provide comfortable working conditions.

斜坡技术，行走安全，更贴合室内设计 Slope design, walking safety

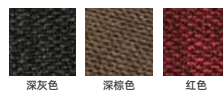

清洁维护 Cleaning

建议每日用吸尘器清洁，每周两次用清水冲洗，每两周用中性洗涤剂刷洗后用清水冲洗。
Using vacuum daily cleaning, Hosing twice a week, Scrubbing with PH7 cleaner twice a month.

Wonderful 稳德福-耐磨型钢化纹抗疲劳地垫

超厚脚感 极致体验

高19.5mm 高密度PVC发泡层 柔软耐磨回弹性好

抗疲劳 室内适用 专利产品 抗静电

抗疲劳地垫是目前员工长期站立工作区域内运用最广泛的地垫，能有效减缓由于长期站立工作带来的身体疲劳，从而保证了工作效率。Anti-fatigue mats are currently the most widely used mats in the long-term standing work area of employees, which can effectively reduce physical fatigue caused by long-term standing work, thereby ensuring work efficiency.

两层结构，优质材料，回弹性好，使用寿命长
Two-layer structure, high-quality materials, good resilience and long service life

贴合地面，不起翘，图案可定制，多场景适用
Fits the ground, does not warp, and the pattern can be customized

清洁维护 Cleaning

建议每日用吸尘器清洁，每周两次用清水冲洗，每两周用中性洗涤剂刷洗后用清水冲洗。
Using vacuum daily cleaning, Hosing twice a week, Scrubbing with PH7 cleaner twice a month.

适用区域 Suitable Area

适用于各种商业环境需要长时间站立工作的区域，如酒店前台、收银台、迎宾处等。
Suitable for areas in various commercial environments where standing work is required for a long time, such as hotel front desks, cash registers, and reception areas.

Bester 倍舒特-半球凸点抗疲劳垫

高15mm空气气囊 缓解站立疲劳

抗疲劳 专利产品 抗紫外线 可拼接 室外适用

产品表面采用创新的空气气囊缓冲结构，能够给长时间站立的工人提供缓解疲劳的舒适体验，从而提高生产效率，橡胶材质的模块化拼接结构，能够灵活应对各种场合需要。The product features an innovative air bubble cushioning structure on the surface, providing a comfortable experience that helps alleviate fatigue for workers engaged in prolonged standing tasks. This, in turn, enhances productivity in their work. The rubber material and modular interlocking design allow for flexible adaptation to various environments and requirements.

卡扣拼接，适合异形铺设，不移位
Snap splicing, suitable for special-shaped laying, no displacement

Urinal Clean System 卫洁-男卫生间尿斗防臭清洁系统3.0

吸水隔尿
拒绝腐蚀地面

派勒专利研发针对男卫生间专用的尿斗垫，吸湿布可锁住滴漏尿液避免挥发；底部防水避免腐蚀大理石地面；立体骨架避免脚踩尿液二次污染；一次性吸湿布，2-4周替换一次，方便快捷。
Paaler patented urinal pads for men bathrooms. Moisture-absorbing cloth can lock dripping urine, and which the bottom is waterproof to avoid corrosion of marble floors. Its skeleton avoids secondary pollution of urine when feet are stepped on., and the cloth replace once 2-4 weeks, which is convenient and fast.

保护地面，耐腐蚀 Protect the ground and resist corrosion

天然石材容易被污渍腐蚀，需铺设卫洁，起到保护作用
Natural stone is easily corroded by stains and needs to be laid and cleaned to play a protective role.

与市面同类产品对比 Compare with similar products on the market

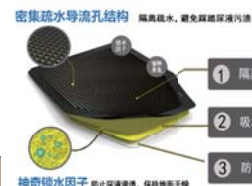

骨架隔离溅水，避免尿到尿液
The skeleton isolates hydrophobicity to avoid stepping on urine.
鞋底直接尿到尿液，产生二次污染
The sole directly touches the urine, secondary pollution.

操作简单，可一次性替换 Disposable replacement

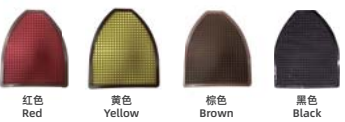

采用卡扣固定，便于更换强力吸湿材料
Fastened with snaps for easy replacement of strong moisture-absorbing materials.

01 地垫边条三种尺寸 Three Size Floor Mat Edges

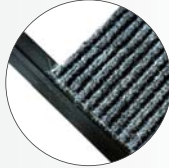

小型地垫胶边条 Small floor mat rubber edge strip
小型边条最低，适用于大部分地毯型地垫，底背大约2mm的产品。
The small rubber edge is the lowest, suitable for most carpet-type floor mats, and the bottom back is about 2mm.

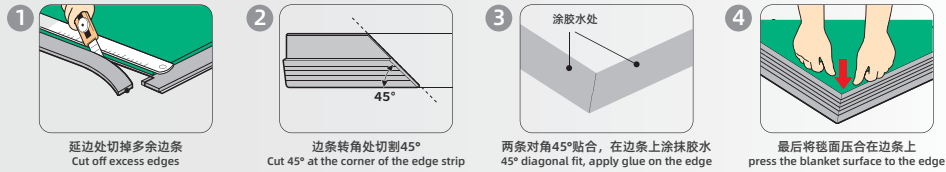

中型地垫胶边条剖面图 Sectional drawing of rubber edge strip for medium-sized floor mat
中型边条高度居中，主要用于艾肯、创达产品。
The height of the medium-sized edge is in the middle, mainly the thick products of Akon, Jett.

重型地垫胶边条剖面图 Sectional drawing of rubber edge strip for heavy duty floor mat
重型边条高度最高，目前主要用于皮克斯、皮卡索模块地垫异形收边使用。
The height of the heavy-duty edge strip is the highest. At present, it is mainly used for the special-shaped edge closing of the Pixor and Picasso modular floor mats.

02 地垫边条安装方法 Side strip installation method

*所需工具：度量尺、美工刀、胶水 Tools needed: measuring ruler, utility knife, glue

胶水
地垫胶边条用特殊胶水粘于地垫底背并外露斜坡。
胶水适用于PVC材质及橡胶材质的粘接，粘接强度高。
*本产品通过权威机构检测，安全可靠。

安全可靠
Safe and reliable

接驳条
纯PVC环保材质，厚度0.5mm，
超薄但坚韧耐用，抗撕裂。
接驳条常规宽度5cm。

地垫清洁维护保养指南 Floor Mat Cleaning and Maintenance Guide

01 维护保养 Maintenance

外包装破损，请不要签收！

地毯型地垫一般是卷装纤袋包装。请您在收到商品时，确认包装是否完好，如有破损，请不要签收，并请立即联系派勒客服，我们会与物流方协商并了解原因，争取赔偿。

地垫打开时不平整，是质量问题吗？

部分卷装的地毯型地垫，打开时可能会产生四周不平整、拼接缝、LOGO拼接等区域弯曲翘起等现象。以上情况均不属于产品质量问题，请您无需担心，派勒出厂产品均通过质检合格。该现象通常产生于地垫材质越厚、或越硬、或天气遇冷，或卷起时间越长，则越容易发生，该弯曲翘起是可以平整的；天气越热、时间铺设时间越久，则平整状态越好。如果您比较着急，可以放在太阳下直射软化，或用外力平压等方法处理平整。

从不同方向看地垫，颜色看上去似乎不一样？

地毯型地垫是一种清洁工具，为了更好的去除鞋底尘土砂石，地毯型地垫的纱线不会很密，要留有容尘空间。因此，踩踏或挤压后，纱线会有一些的倒伏，这就是绒向。视觉上，从不一样的方向和角度去看，会存在一定的颜色差异。两幅拼接的地垫由于拼接两边的地垫倒伏方向不完全一致，拼接缝看起来会比较明显，似乎有一定的色差。

以上均不是色差问题，请您无需担心。随着地垫的使用和日常维护，绒向会逐渐恢复，并趋于一致，有拼接缝和色差的问题会改善与消失。

地垫包装中的纸卷芯，请不要扔掉！

地垫收卷时需要它，可以在存储时更好的保护地垫。

02 清洁方法 Cleaning method

① 日常清洁：直立式滚刷吸尘器

- 高人流区域——每天
- 低人流区域——2-3天
- * 强烈建议使用直立式滚刷吸尘器！能够将纱线根部的灰尘翻起，吸尘更彻底，并起到修整簇绒的效果！

② 深度清洁

- 高压水枪
- 清洗后用出风机吹干，每60天进行一次。
- 地毯清洗机
- 清洗后用出风机吹干，每60天进行一次。

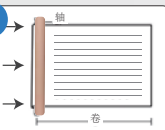

③ 顽固污渍

对于顽固污渍，可在高压水枪/地毯清洗机中配以中性清洁剂进行清洗。

03 收卷方法 Rolling method

① 卷轴

地垫必须卷起来收卷。毯面朝内，背底朝外收卷。请不要折叠地垫！收卷地垫时应使用纸卷轴，以避免出现大面积死折及卷痕。当地垫宽度大于四米时，需三人同时进行收卷，两人在卷头，一人在卷中。

② 移动

卷收过程中如果需要移动地垫请勿直接扯拽边条，可在地垫毯面内弯折5公分抓握住地垫，从而进行移动。

③ 卷紧

卷收后，如比较松散，可继续向前滚动一段距离，直至地垫卷紧。

04 存放方法 Storage method

地垫上方禁止压放重物。

地垫应平躺存放，禁止竖向立起存放，避免边条断裂。

长时间不使用的地垫，存放时一定要放置卷轴。

长时间不使用的地垫，需做好外包装保护，避免硬物刮蹭等造成破损问题。

04 注意事项 Cautions

请勿用烟头或其它明火烧烤地垫。

冬天气温较低，地垫面积较大时，请尽量避免多次移动收卷。

地垫产品具有热胀冷缩性，日晒受潮易膨胀。建议铺设时，不要完全顶铺或者顶到并坑边缘，需留有3%左右的缝隙，以防产品日晒或受潮后起鼓包，影响美观，并产生绊倒人的安全隐患。

请勿使用尖锐物体割划地垫。

请避免过重、局部压强过高的物体压过地垫，如细轮车、载重车等。如需通过，请使用三合板等硬质板材放在地垫上方。

请勿拉扯、折弯边条。

请避免长距离拖拽移动；如需移动，可使用小推车搬运。
